Claim Rejections - 35 USC § 112

Applicants amendment obviates Examiners previous rejection, therefore the rejection has been withdrawn.

Election/Restrictions

Claims 1-13, 35-37 are directed to an allowable product. Pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86), claims 14-29, directed to the process of making the patentable product, previously withdrawn from consideration as a result of a restriction requirement, in the office action of 3/18/2004 now subject to being rejoined. Claims 14-29 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Since all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement made in the Office action mailed on 3/18/2004 is hereby withdrawn.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Patricia DeSimone on 11/23/2004. The application has been amended as follows:

In the claims:

In claim 14, line 6, after "100 and 400 Angstroms" insert -- wherein in step (a) the pore former is incorporated in an amount of between 0.01 and 10 percent by weight based upon the total weight of the catalyst reagent--.

In claim 37, line 2, after "a catalyst reagent" insert -- wherein the pore former is present in an amount of between 0.01 and 10 percent by weight based upon the total weight of the catalyst reagent--.

Allowable Subject Matter

Claims 1-29 and 35-37 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicants define metal oxide to exclude silicon oxides such as those in molecular sieves. Prior art of record fails to teach or suggest a metal oxide alkylation catalyst composition comprising a pore former and catalyst reagent wherein the pore former is present in an amount between 0.01 and 10 percent by weight based on total weight of the catalyst reagent. Prior art of record fails to teach or suggest a method of making requires at least one catalyst reagent selected from the group consisting of magnesium reagents and iron reagents.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jennine M. Brown whose telephone number is (571) 272-1364. The examiner can normally be reached on M-F 8:00 AM - 6:00 PM; first Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Bell can be reached on (571) 272-1362. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
